SECURITY™

## RAPiD™ Safe

Introducing the RAPiD™ safe – a revolutionary concept in firearm protection that combines intuitive ease of access with safety and security.

### FAST, TOUCH-FREE ENTRY

Open your safe in the blink of an eye - the RAPiD™ safe is the first to use patent-pending Radio Frequency Identification (RFID) for instant access. Simply place the included RFID bracelet, card, or key fob over the reader, and the RAPiD™ safe springs open to present your handgun.\*

### CHILD-RESISTANT DESIGN

Built to exceed the ASTM International performance standards for youth resistant firearms containers, the RAPiD safe provides a high level of child resistance and unauthorized access protection.

### ACCESS OPTIONS

The RAPiD™ safe can be opened with the RFID bracelet, card, or key fob, or with a personally programmed code. It is also accessible with a conventional key lock.

### SAFE AND READY

AC power means your handgun is both protected and ready to go 24/7. The RAPiD™ safe also features a battery backup that may be used as a primary power source. Upon opening, the internal RAPiD™ sleeve presents your handgun at the perfect angle.

### HEAVY-DUTY CONSTRUCTION

The RAPiD™ safe weighs over 15 pounds, and features wrapped, 16-gauge steel construction and a heavy-duty ¼" steel dual-lug locking system. A 1,500 lb.-rated cable secures the safe to an immobile object for additional theft protection.

**No. 98150**

**\* IMPORTANT: Do not store loaded firearms in any safe. Follow local laws for firearm storage.**

*The three methods of instant RFID access consist of a card, bracelet, and key fob.*

**Patent-pending  
RFID security technology**

The RAPiD™ safe uses standard household 110V power and features a battery pack for use as a backup power source or primary power.

Inside the RAPiD™ safe is the padded RAPiD™ sleeve that presents handguns at the perfect angle. The RAPiD™ sleeve is removable, enabling storage of most revolvers with barrels as long as 6 inches. Also includes a security cable that is rated to 1,500 lbs.

Security cable, barrel key and RFID access options.

## ArmLock™ Box & TriPoint™ Lock Box

### CHILD-RESISTANT DESIGN

Built to exceed the ASTM International performance standards for youth resistant firearms containers.

### HEAVY-DUTY CONSTRUCTION

Both are constructed of 16-gauge steel, which is far superior to the 20-gauge steel used by other products on the market.

### PRODUCT FEATURES

- Built to exceed ASTM standards for child resistance and protection from unauthorized access
- Both safes can travel with you and meet TSA requirements for handgun security in luggage\*
- Industry first, patent pending TriPoint™ locking system features 3 points of contact
- Three, ½" wide steel locking lugs
- Padded interior
- Ideal choice for concealed carry permit holders

### ArmLock™ Box **NEW!**

A patent-pending ArmLock™ system features a ⅛" laser cut, steel shackle that adjusts to accommodate objects up to 3½" in diameter. **No. 98151**

Exterior: 10.25"x8"x3" Interior: 9.75"x7.5"x2.25"

The ArmLock™ shackle can be adjusted to fit around objects as large as 3½" in diameter.

Adjustments are made by pulling the spring loaded knob that releases the ArmLock™ shackle.

### TriPoint™ Lock Box **NEW!**

The TriPoint™ lock box provides affordable security for your handgun and other valuables, with patent-pending TriPoint™ locking system and a security cable that is rated to 1,500 lbs.\*

Exterior: 10.25"x8"x2.75"  
Interior: 9.75"x7.5"x2.25"

**No. 98152**

**\* IMPORTANT: Do not store loaded firearms in any safe. Follow local laws for firearm storage. Check TSA regulations and airline policies before traveling with any portable safe.**
