SPEER®

2023

When law enforcement agencies select ammunition to defend their communities, they choose Speer® Gold Dot®. When serious shooters train, you'll find Speer Lawman® in the chamber. And when reloaders set out to craft the finest possible handloads for any game or target, they reach for Speer's vast line of component bullets.

Our bullets and ammunition have defined an industry, and we're proud to keep advancing.

Thank you for trusting Speer.

THE NEXT GENERATION OF PROTECTION

Previously only offered to law enforcement, Speer® Gold Dot® G2® offers the ultimate performance for self-defense thanks to an exclusive nose design. Instead of a large hollow-point cavity, Gold Dot G2 has a shallow dish filled with a high-performance elastomer. On impact, the material is forced into engineered internal fissures to start the expansion process. The result is extremely uniform expansion, better separation of the petals, and more consistent penetration across barrier types through full-size handguns.

While most self-defense bullets use a deep hollow point to initiate expansion, Gold Dot G2 has a shallow dish filled with an elastomer material. On impact, this material forces the bullet open, providing consistent expansion through any barrier.

SPEER® GOLD DOT® G2®

Caliber	Part #	Bullet		Test Barrel Length (in)	Muzzle	Velocity, fps			Energy, ft-lbs			Trajectory (25 yd sight-in), inches*			
		Wt. (grs)	Type			50 yds	100 yds	Muzzle	50 yds	100 yds	25 yds	50 yds	75 yds	100 yds	
9mm Luger	24226	147	GDG2	4	1020	955	903	340	298	266	0	-1.3	-5.1	-11.3

Handgun Trajectory: bullet path relative to line-of-sight when sighted for 25 yards (sight height 0.9 inch). Test barrels are used to determine ballistic figures. Individual firearms may vary. These figures are approximate and are shown for reference. These trajectory tables were calculated by computer using the best available data for each load. Trajectories are representative of the nominal behavior of each load at standard conditions (59°F temperature; barometric pressure of 29.53 inches; altitude at sea level). Shooters are cautioned that actual trajectories may differ due to variations in altitude, atmospheric conditions, guns, sights and ammunition.

COMPACT DEFENSE

Compact pistols have never offered this level of protection. We built upon the law-enforcement proven Gold Dot® G2® bullet, optimizing the design and loading to provide superior feeding, ballistics and terminal performance through compact concealed handguns. Gold Dot Carry Gun features the original's exclusive bullet nose design. Its shallow nose cavity is filled with a specially engineered elastomer that starts the expansion process on impact.

GOLD DOT CARBINE

NEW

CHANGING THE SCALE OF PROTECTION

For the first time ever, defenders can get Gold Dot's legendary accuracy and terminal performance in ammunition built specifically for carbine platforms. Gold Dot Carbine produces ideal velocities through carbine-length barrels and cycles flawlessly. The G2-style, elastomer filled bullet nose is tuned to produce extremely effective penetration and expansion through common barriers. **Coming soon in one 135-grain 9mm Luger load.**

Shooters are cautioned that actual trajectories may differ due to variations in altitude, atmospheric conditions, guns, sights and ammunition.

CAPACITY MEETS CONCEALMENT

The No. 1 bullet choice of law enforcement with the biggest handgun cartridge introduction in generations. It all comes together in all-new Gold Dot® 30 Super Carry. The cartridge uses a .312-inch diameter projectile to deliver as much muzzle energy as 9mm Luger, with terminal performance that far exceeds that of 380 Auto. The size of the 30 Super Carry cartridge offers more magazine capacity than 9mm Luger, as many as three more rounds in initially available handguns. The bonded Gold Dot bullet design gets even more from the cartridge, with higher weight retention, deeper penetration and more effective expansion.

Delivering equivalent muzzle energy as 9mm Luger, the 30 Super Carry cartridge produces large, consistent expansion when harnessed by the legendary Gold Dot bullet design.

MAGAZINE CAPACITY

GOLD DOT SHORT BARREL® PERSONAL PROTECTION

FULL-SIZE DEFENSE FROM COMPACT PISTOLS

At one time, packing a compact handgun meant sacrificing performance. Gold Dot Short Barrel has changed that. It works in barrels as short as 1.9 inches and has been proven by both law enforcement and private citizens. The loads produce less felt recoil while achieving reliable expansion at a variety of distances and velocities.

GOLD·DOT®

TESTED. PROVEN. TRUSTED.

Gold Dot® ammunition's reliability has made it the No. 1 load for law enforcement, and we offer the same performance to you. Using our exclusive Uni-Cor® method, we bond the jacket to the core one molecule at a time at the very beginning of the bullet construction process. This virtually eliminates core-jacket separation and creates a precision hollow point that is accurate, tough and unbelievably consistent. With options for both standard handguns and short barrels, there's a Gold Dot load to fit any shooter.

CONSTRUCTION

1

The Speer® Gold Dot bullet begins with an alloyed lead core.

2

Gold Dot technology bonds an incredibly uniform jacket to the core—one molecule at a time.

3

First stage of the patented two-stage hollow point process creates memory lines that expansion can follow.

4

Second forming stage finishes the cavity to match bullet weight and velocity, producing a smooth leading edge for reliable feeding, and a uniform heel for superb accuracy.

Gold Dot has been proven to provide optimum penetration and expansion through ballistic gelatin and all barriers used in FBI protocol testing. Tests conducted with 9mm Luger 124-grain +P Gold Dot (23617).

GOLD·DOT®

KEEPING THREATS BEYOND ARM'S LENGTH

Gold Dot® ammunition's reliability has made it the No. 1 choice for law enforcement, and now we offer the same performance for self-defense rifle applications. New Gold Dot Short Barrel rifle is engineered to provide industry-leading performance in FBI protocol testing through common defensive rifles. Its bullets are built using Speer's exclusive Uni-Cor® method.

TAKE TRAINING TO THE NEXT LEVEL

If you practice with ammunition that doesn't match the ballistics of your carry loads, you're not training—you're just shooting. That's why we build Speer[®] Lawman[®]. It's extremely reliable, with feel and point of aim that's as close as possible to comparable defense loads. All options feature reloadable brass and a Speer TMJ[®] bullet with a jacket that encapsulates the entire lead core for clean, consistent performance.

LAWMAN CLEAN-FIRE[®] TRAINING

CLEAR THE AIR

Lawman Clean-Fire ammunition gives shooters ideal indoor options. These offerings use the patented Clean-Fire primer, which contains no lead, barium or antimony. And the bullet is Speer's TMJ. This means the lead core is completely encased so powder gases can't burn lead off the bullet base. Range air, and your firearm, will be much cleaner when you shoot these special loads.

THE VISIBLE DIFFERENCE

Lawman Clean-Fire spent cases look almost unfired when compared to traditionally primed ammunition. The heavy metals have been removed, producing a clean burn.

Lawman, 45 Auto 230-grain,
5 shots handheld at 50 feet,
1.125-inch group

○ Speer TMJ bullet with one-piece jacket

○ The lead core is completely and seamlessly encased in jacket material, so powder gases can't burn lead off the bullet base

○ Reloadable brass cases manufactured to tight tolerances

○ Clean-burning propellants deliver optimum velocity while ensuring consistent chamber pressures

○ CCI[®] primers for highly sensitive and reliable ignition

BIG GAME & SELF-DEFENSE RIFLE BULLETS

When you plan the hunt of a lifetime, load Speer® big game rifle bullets, including our all-range Impact. When you plan for the worst, choose our Gold Dot® rifle bullets. All have been proven by decades of service in the field. Trust them when the moment of truth comes.

IMPACT

MAKE DISTANCE MEANINGLESS

Take your hunts and your handloads farther than you ever thought possible. The new Speer Impact blends tough, molecularly bonded construction with high ballistic coefficients and the Slipstream™ polymer tip. The combination results in deep penetration at close range as well as extreme accuracy and consistent low-velocity expansion at long distances.

GRAND SLAM™

SUPERIOR PERFORMANCE, EXCEPTIONAL ACCURACY

With a tapered, precision-drawn jacket and a long nose, the Grand Slam bullet is engineered to blow through the thick hides, heavy bones and tough bodies of the world's biggest game—without sacrificing accuracy. On impact, internal jacket flutes allow consistent expansion, yet the bullet retains most of its weight for deep penetration every time.

HOT-COR™

CONSISTENT AND ACCURATE

Get incredibly reliable all-range accuracy and terminal performance with Speer Hot-Cor bullets. Molten lead is poured into the jacket during the construction process to maximize consistency while minimizing cost to the shooter.

BOAT-TAIL

BUILT FOR LONG RANGE

Extend your range on medium game with Speer Boat-Tail bullets. Designed for the long-range shooter, the tapered heel of these bullets flattens trajectories and decreases wind drift. On impact, they expand rapidly for quick, clean kills.

GOLD DOT PERSONAL PROTECTION

DEMONSTRATED SELF-DEFENSE

Speer offers duty-proven performance in a new line of Gold Dot Personal Protection rifle bullets. Their exclusive manufacturing process bonds the uniform jacket to the core one atom at a time, ensuring proper expansion, nearly 100 percent weight retention and immediate, threat-stopping performance.

VARMINT RIFLE BULLETS

When you get a shot at a predator—or a varmint that’s constantly being hunted by them—it’s often just for an instant and at long range. At Speer®, we understand this, so we carefully craft a full line of bullets designed specifically for the needs of predator and varmint hunters. All are pinpoint accurate and consistent, and provide terminal performance that puts down targets in their tracks.

TNT GREEN®

LETHAL AND LEAD-FREE

Exclusive non-lead bullet technology gives Speer TNT Green an edge over all other options—and all varmints. The bullet uses a thin jacket around a compressed powder core to produce not only long-range accuracy, but also explosive expansion and instant energy release on impact.

TNT®

EXPLOSIVE AND ACCURATE

Speer TNT gives predator and varmint hunters what they want most—long-range accuracy and maximum destruction on impact. Its thin precision jacket features internal fluting to ensure complete bullet disruption, while its high ballistic coefficient produces the flattest trajectories possible.

VARMINT HOLLOW POINT

VERSATILE AND DEADLY

Whether you’re poppin’ prairie dogs, taking aim at the range or calling ‘yotes, you can count on Speer Varmint Hollow Points to deliver explosive performance and excellent accuracy. Available in a variety of calibers.

VARMINT SOFT POINT

ALL-AROUND PERFORMANCE

When you’d prefer controlled expansion over explosive terminal effects, choose Speer Varmint Soft Points. Their Spitzer tip provides both accuracy and superior terminal performance.

TARGET & PLINKING RIFLE BULLETS

Whether you compete for trophies at the highest levels or just for bragging rights at the range, you need projectiles that are reliable and accurate. Speer's line of rifle target bullets deliver for any need.

JACKETED HOLLOW POINT

COST-EFFECTIVE CONSISTENCY

High-volume shooters need consistent and affordable bullet options. The Speer® Jacketed Hollow Point delivers—without the hefty price tag.

TARGET MATCH

EXTENDED-RANGE ACCURACY

Shooting at extreme range requires a special kind of bullet. Speer Target Match projectiles have what it takes to go the distance—any distance—thanks to a low drag profile, precision jacket and consistent hollow point.

TMJ®

CLEAN AND ACCURATE

Speer TMJ stands in a category all its own. Standard FMJ bullets sacrifice accuracy by adding a separate piece of jacket to cover the bullet base—or leave exposed lead. TMJ rifle bullets totally encapsulate the lead core for cleaner, more accurate performance.

HUNTING & PERSONAL PROTECTION HANDGUN BULLETS

Be prepared for a dream hunt or nightmare encounter with Speer's hard-hitting line of handgun bullets designed for hunting and defense. All utilize our electrochemical bonding process and other exclusive technologies so you can trust them to perform whenever called upon.

DEEPCURL[®] HUNTING

TOUGHNESS REDEFINED

Speer[®] electrochemically bonds the DeepCurl jacket to the lead core to create the toughest, most accurate handgun hunting bullet possible. Pre-formed petals expand reliably and consistently and the bullet's high weight retention ensures deep penetration on heavy-bodied game.

GOLD DOT[®]

PROVEN BY LAW ENFORCEMENT

Law enforcement professionals trust Gold Dot for a reason. The bullet's exclusive manufacturing process bonds the uniform jacket to the core one molecule at a time, ensuring proper expansion and nearly 100 percent weight retention. The result is immediate, threat-stopping performance.

To see how Gold Dot bullets are constructed, see page 6.

GOLD DOT[®] SHORT BARREL[®] PERSONAL PROTECTION

FULL-SIZE PERFORMANCE

Speer offers the same bullets used in Gold Dot Short Barrel ammunition as a component for your reloading needs. These bullets are engineered for excellent expansion at velocities common to short-barreled handguns.

DEEPCURL® HANDGUN HUNTING

Caliber	Part No.	Diameter	Weight	Bullet Type	BC	SD	Box Count

ABBREVIATION KEY: DCHP = DeepCurl Hollow Point, DCSP = DeepCurl Soft Point, CANN = Cannulure

DeepCurl's unique construction process joins the jacket to the core at the molecular level for excellent performance and consistency. For this reason, conventional reloading data developed for standard jacketed bullets should not be used to load DeepCurl bullets. Only DeepCurl-specific reloading data or Gold Dot bullet data for the same part number released by Speer Bullets should be used. It can be obtained by contacting Speer Technical Services at 800-379-1732.

TARGET & ACTION HANDGUN BULLETS

You expect peak performance in all other forms of shooting—insist on it at the range as well with Speer's complete line of handgun bullets. Our target and action pistol projectiles are built with our most exclusive technologies to perform to the highest standards.

TMJ®

CLEAN CONSISTENCY

Speer® uses Uni-Cor® technology to take full metal jacket bullets to their highest level of evolution with the Total Metal Jacket. Other FMJ bullets have an accuracy-robbing second piece to cover the lead, or have lead exposed at the base, which can deform under pressure. TMJ's seamless jacket means this can't happen. There's less airborne lead, and TMJs won't foul ported recoil compensators like open-base bullets do. We swage each bullet twice, ensuring consistent diameters and a uniform heel. TMJ bullets are great for action pistol competition.

JACKETED

READY FOR ACTION

Jacketed Handgun Bullets with Uni-Cor® technology boast a perfectly uniform jacket and are great options for action and competitive shooting. They are available in calibers from 32 to 50.

LEAD HANDGUN

MODERN CLASSIC

Speer cold-formed lead bullets are even better than ever with a technologically advanced multi-layer lube. The coating won't burn off, virtually eliminating leading problems and ensuring cleaner, more accurate shooting. It also won't melt off in storage or transport and is dry to the touch.

Available in calibers from 32 through 45, exclusively in bulk packs.

COPPER PLATED

ECONOMIC ACCURACY

Copper plating encapsulates the lead core of these handgun bullets. The result is reduced airborne lead and consistent, accurate performance.

ABBREVIATION KEY: TMJ = Total Metal Jacket, RN = Round Nose, FN = Flat Nose, SWC = Semi-Wadcutter, JHP = Jacketed Hollow Point, JSP = Jacketed Soft Point, WC = Wadcutter, HP = Hollow Point, CANN = Cannulure

SPECIALTY AND ACCESSORIES

Shooters' needs are as varied as shooters themselves. At Speer®, we recognize this with specialty products that fulfill these unique facets of shooting, and our Handloading Manual serves as the ultimate resource for handloading recipes and information.

PLASTIC TRAINING BULLETS & CASES

PRACTICAL PRACTICE

For informal target practice in places with a minimal backstop, finding the proper ammo isn't always easy. Speer Plastic Training Bullets & Cases make the perfect practice load. Reusable molded plastic cases and bullets powered by CCI® large pistol primers provide an accurate and inexpensive alternative. They are designed for 25-foot shooting.

Simply prime the case, insert the plastic wadcutter bullet and you're ready to go. Primer power alone propels the lightweight bullet 300-400 fps. You can stop these in a simple bullet trap made from carpet scraps and cardboard. Bullets can be reused several times.

Bullets and cases are sold separately, so you can replace lost or damaged bullets. They are packed 50 bullets or cases to the box. The 45 Auto bullet is designed to readily load in a standard reloadable brass case with a modified flash hole.

This is not loaded ammunition. Primers are not included. Recommended for handguns only. Use only in areas with adequate ventilation. Do not use any propellant powder when assembling these cartridges.

PLASTIC BULLETS & CASES

Product	Bullet Part #	Case Part #	Box Count
38 Cal	8510	8515	50
44 Cal	8520	8525	50
45 Cal*	8530	See Notes	50

Note: 45 cal. bullet is used with standard brass case. * For 45 Auto only.

EMPTY SHOT CAPSULES

PEST LOADS FOR HANDGUNS

Create custom cartridges with our Empty Shot Capsules. Simply fill them with size 8 or 9 shot (not included), snap in the base wad, and load like a conventional bullet. Shot Capsules include base wads and are available in 44 caliber and 45 Colt (25 count), and 38/357 (50 count). Loading data is available in the Speer Handloading Manual.

Intended for short-range pest and varmint control. Not recommended for self-defense. Not for use in firearms with ported recoil compensators.

EMPTY SHOT CAPSULES

Product	Part #	Box Count
38/357 Cal.	8780	50
44 Cal	8782	25
45 Colt	8785	25

SPEER HANDLOADING MANUAL #15

YOUR GUIDE TO PERFECT HANDLOADS

Decades of reloading knowledge and the latest recipes and techniques have been distilled into a single source: The Speer Handloading Manual No. 15. This new edition is Speer's largest volume yet, featuring updated recipes with the latest propellants for more than 120 legacy cartridges, as well as data for 13 new cartridges, including 204 Ruger, 6,5 Creedmoor and 300 Blackout. The all-encompassing manual also provides recipes for loading new Gold Dot® rifle component bullets, and articles by professional shooters Julie Golob and Jim Gilliland.

Part # SRM15 — Handloading Manual

LEAD ROUND BALLS

TRADITION MEETS PRECISION

Speer offers a variety of lead balls for the traditional shooting enthusiast. Great care is taken to ensure smoothness and shape uniformity for better accuracy. Lead balls are packaged in our unique black plastic boxes for added protection and convenience.

LEAD ROUND BALLS

Ball Diameter (inches)	Part #	Approximate Weight (Grains)*	Box Count
0.350	5110	64	100
0.375	5113	79	100
0.433	5127	121	100
